

Product Advisory Notice

Product Type/Version :
AccuVote-OS PC1.96.6
and earlier firmware versions

Advisory # : 2006-001
Revision : 1.0
Date : 10-10-2006

Summary: Potential issue on AccuVote-OS with Straight Party Voting.

Note: This notice is only for jurisdictions that use the optical scan system with Straight Party Voting.

There is a potential issue with straight party voting on AccuVote-OS units when not all of the parties (Voter Groups) defined in the election are selections in the straight party race.

This issue can be negated by ensuring that only the parties (Voter Groups) that are selections in the straight party race are defined as parties (Voter Groups) for the election. If other candidates need party designations include them as part of the candidate text.

Jurisdictions with questions regarding this Product Advisory Notice should contact their local support representative or the DESI HelpDesk.
